Hi everybody!

I'm writing this post to tell you that I was on an internship abroad in May . The internship lasted a month. As I wrote at the beginning it was an internship abroard , so you are surely curious where I was . I was in Spain in the city of Valencia . At the beginning , when I found out I got in , I was happy and a little scared .
I wroked in a hair salon . There was a very friendly atmosphere in the hair salon . The hairdressers who worked there were open and friendly. Through this internship I could win new experience , but also see how hairdressers work in another country .
 I also visited two cities : Alicante and Xativa . In the cities I visited castles from which the view was breathtaking . I was also in diffrent museums , the oceanarium and bio park . I also took part in many events such as show kites .
These were amazing experiences and I will definitely remember them for the rest of my life . I'm glad that I had such an opportunity.

Here you have some photo:
